Expanse Now

Intelligent mobile solutions for care teams to connect, coordinate, and collaborate

Expanse Now delivers the convenience and mobility of the Expanse intelligent platform on our smartphone app, with tools for clinicians to access vital patient information from home, in the clinic, or at the hospital, without needing to connect to the full EHR.

Providers complete documentation and administrative tasks quickly and conveniently and stay connected with their colleagues and patients.

Connect

Ambient listening

Ability to support ambient listening encounters with patients to leverage AI-generated notes in workflow.

Care team messaging

Clinicians share secure, real-time, coordinated communication with all members of the care team, improving responsiveness and efficiency.

Direct calling

Providers call care team colleagues and patients with a single click.

Collaborate

View reports

Drive collaboration among care team members by sharing provider notes within the patient summary.

View orders

Review a patient's current and historical records while rounding or when away from a computer station.

View diagnostics and vitals

Easily access the most recent patient documents, including PACS and EKGs, with links to imaging reports and vitals.

Coordinate

Panel management

Expanse Now's panel management functionality allows doctors to review the patients assigned to them, search for patients, or manage other providers' workloads when covering for them.

Quick documentation

Quick documentation allows providers to dictate a chart or phone note to follow up after the on-call encounter.

ePrescribing

Clinicians can manage the entire prescription process, including reviewing medications, queueing prescriptions, consulting the PDMP, using two factor authentication for controlled substance ordering, and transmitting orders to pharmacies.

* Not all Expanse Now functionalities are available in all territories.

* Available via Google Play or the Apple App Store.
